Dade. 1604.

A Prognoſtication

in which you may beholde *the ſtate of this yeere of our* Lord God, 1604.

Being Leape yeere.

Made and ſet forth by Iohn Dade Gent: practitioner in Phiſicke.

Imprinted at London for *the aſſignes of Iames* Roberts.

BRITISH
MUSEUM

A Diſcription of the foure quarters of the yeere: And firſt of *Winter*. 1604.

☉ in ♑. ♒. ♓.

WInter according to our Engliſh accompt, began the laſt yeere 1603. at the time of the Sunnes ingreſſence into Capricorne (viz.) the xii. daye of December being Monday, at which time was the Brumall Solſtice or ſhorteſt day of the yeere, by reaſon of the Sunnes greateſt declination from the Equinoctiall line: which Winter continueth vntill the xi. day of March next following being Sunday. Concerning the generall affection and inclination of the ayre, by artificiall circumſtances I gather that it will not much differ from the naturall diſpoſition, as hereafter is euery day ſpecified throughout the whole quarter.

The griefes moſt like to inuade and vex mens bodyes within this Winters reuolution, are Feuers of diuers ſorts, proceeding eyther of corrupt blood, or rawe and crude humors: Alſo Rheumes, Catharres, Coughes, Hoarſeneſſe, Sore eyes, Deapſie, Head ache, Tooth-ache, paine in the Backe, Breaſt, Stomack and Lungs, whereof many aged perſons are like to feele the extremitie.

In theſe and in all other diſeaſes and griefes, the Lord of all mercie graunt vs ſuch remedy and comfort, as may beſt tend to his honor and glory, and the ſaluation of our ſoules.

Of the Spring.

☉ in ♈. ☌. II.

THe Spring time being the second part of the yeere Astronomicall, taketh his beginning on Sunday being the 11. day of March. The Sunne then entering into the first minute of Aries the Equinoctiall point, making the dayes and nights of one equall length. This Spring quarter continueth vntil the xii. daye of June following, when the Sunne enters into the signe Cancer.

This season of his naturall qualitie is hotte and moyste, and likewise very temperate and healthfull, yet bringeth it, or rather sheweth forth many sicknesses, not ingendring them by excesse, but discouering such as were inwardly bred by the distemperature of other times.

Touching the state and temperature of the weather this quarter, it is like to be very well, especially in Aprill and May, which will vnhappilye be a preiuduce to corne on the ground, as may further be seene in the dayly disposition of this season.

The griefes and infirmities likely to molest the bodies of men, women, and children in this season, are Coughes, paines in the sides, Tertian agues, Tooth-ache, Swimming in the head, Measels, small Pockes, paines in the Eyes, paines of the Diaphragma and the Lungs, Scabbes and Iche, sundrie Fluxes, and ache in the ioynts.

Of

Of the Summer quarter.

☉ in ♋. ♌. ♍.

SUmmer (accounted the third part of the yeere Aſtronomicall) beginneth at the Sunnes ingreſſe into the firſt minute of Cancer, at which time he is in his neereſt proximitie to our verticall point, making his greateſt declination towards the North from the Equinoctiall, cauſing the Summer or Eſtiuall Solſtice, which ſhall be this yeere on Monday the xi. day of June.

Touching the condition and ſtate of the weather, herein it may be ſeene in the dayly inclination of the weather.

The ſickneſſes of this time are diuers and greeuous, threatned as well to men as to women, as burning Agues, Pluriſies, Frenſies, hotte Apoſtumes, diuers paines in the head, noyſome Sweatings, ſundrie inflamations, beſides the Peſtilence in diuers places, and Peſtilentiall Feuers, with ſome ſtrange and new infirmities, proceeding eſpecially of hotte and Cholericke humors, wherewith many ſhall bee vexed, and not a fewe bereft of their liues this quarter.

Of Autumne.

☉ in ♎. ♏. ♐.

AUtumne or Harueſt, the moſt profitable time of the yeere, beginneth at the Sunnes entrance into the firſt minute of Libra, working the ſame effect that he did

at his going into Aries, that is, making the day and night iust of one length, the Sunne then riſing at vi. in the morning, and ſetting at vi. at night, which ſhall be this yeere on Thurſday the xiii. day of September, continuing vntill Tueſday the xi. day of December next enſuing.

The diſpoſition of this quarter is euer more to be inconſtant and variable, by meanes whereof it is the nurſe of moſt ſickneſſes happning in the Spring. Wherefore I aduiſe all men to liue circumſpectly therein, both for dyet and other matters concerning health. How the ayre will be inclined throughout all Harueſt, may be ſeene in the daily diſpoſition of the ſeaſon.

The diſeaſes in this quarter of this yeere, moſt doubtfull to afflict the body, are Quartaine Agues, Black Iaundies, windineſſe about the Midriffe, Crampes, Stiches, ache in the ioynts, the Goute, the Sciatica, with other ſickneſſes very greeuous.

A briefe

A briefe note how the seauen Planets are placed aboue the skie or vnder the earth, for euery month after Sunne is downe, by which you may perceiue how they keepe their motion night and day all the yeere, &c. Moreouer the good dayes of Sympathie touching mans complexion and body in causes of administration of Phisicke or such like: And also the euill dayes (according to the maleuolent aspects of the Planets) in which it is dangerous to let blood, take Vomits, Purgations, Sweates, or such like attempts.

Of Ianuary.

Saturne, Iupiter, Mars, and Mercurie, are all vnder the earth at Sunne setting.
Venus goeth downe with the Sunne.

THe first day some moysture falleth. The ii. day fayre. The iii. day windy and lowring. The iiii. moyst weather. The v. day windie and like to raine, or some sharpe stormes.

Full Moone on Friday the vi day, at ten of the clocke, 17. min. at night. The vi. and vii dayes, raine or other moysture. The viii. and ix. dayes more temperate. The x. day troublesome weather. The xi. day some change. The xii. day pinching windes and stormes.

Last quarter on Friday the xiii. day, 22. min. before two of the clocke in the afternoone. The xiii. xiiii. xv. and xvi. dayes, snow or other moysture falleth. The xvii. day fayre.

The xviii. xix. and xx. dayes, lowde windes bringing much raine or snow.
